

Redmine - Defect #8992

Unable to access object in WikiMacros in forum topic message

2011-08-05 14:39 - Vitaly Klimov

Status:	New	Start date:	2011-08-05
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Forums	Estimated time:	0.00 hour
Target version:		Affected version:	1.2.1
Resolution:			

Description

Right now WikiMacro receives nil object if called from main forum message so macro does not have access to files attached to the message.

To fix it in both preview and view modes we should do following:

Fix for view mode

Line 16 of the file `app/views/messages/show.rhtml`

```
<%= textilizable(@topic.content, :attachments => @topic.attachments) %>
```

should be changed to

```
<%= textilizable(@topic, :content, :attachments => @topic.attachments) %>
```

Fix in edit mode

Also, to have access to attached files in message preview:

- Variable `@previewed` should be set to `message` in file `app/controllers/messages_controller.rb`, method `preview`
- Hash value `:id` should be added and set to [Dmitry Polovka](#) in file `app/views/messages/edit.rhtml` (line 7):

```
{ :url => { :controller => 'messages', :action => 'preview', :board_id => @board, :id => @message },
```
