Redmine - Defect #9018

Problem configuring subversion SCM

2011-08-09 16:00 - W N

Status:	New		**Start date:**	2011-08-09
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	SCM		**Estimated time:**	0.00 hour
Target version:				
Resolution:			**Affected version:**	1.2.1

Description

Hi matter how I would configure the svn command it does not work. Allways displays "Scm command not available. Please check settings on the administration panel." If I go to the admin panel I see the command I've put in but there is still red exclamation sign. Can you please provide some feedback how to solve this. I have already tried:
- upgrade of svn to version 1.6.x
- setting PATH in environment.rb
- change SVN_BIN in subversion_adapter.rb and adding stuff for certificates handling
- setting scm_subversion_command in configuration.yml
None of these works....

History

#1 - 2011-08-09 16:01 - W N

I forgot to say that Redmine is on MySQL, CentOS via httpd.

#2 - 2011-08-09 23:39 - Toshi MARUYAMA

- Category set to SCM

- Priority changed from High to Normal

#3 - 2011-08-13 20:45 - W N

with 1.2.0 same setup works perfectly correctly (with default config)

#4 - 2011-09-21 10:49 - Nandana Mihindukulasooriya

I faced the exact same issue after upgrading from 1.0.1 to 1.2.1. Is this a bug in 1.2.1 ? Are there any work around for this ? This has become a show-stopper for us. Thanks.

Best Regards,
Nandana
