

Redmine - Defect #9035

reposman: Great svn problems with Upgrade from redmine 1.0.5 to 1.2.1

2011-08-10 19:55 - Otto Meier

Status:	New	Start date:	2011-08-10
Priority:	High	Due date:	
Assignee:		% Done:	0%
Category:	SCM extra	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			
Description			
After some odds I had a functional environment, I thought but I could not really create svn repos with reposman. In the database table "repositories" the column `root_url` was'nt filled in. The other columns seems to be ok.			

History

BTW: The repos has been created but there was no way to get its content from redmine due to missing entries in column `root_url`, I think.

#2 - 2011-08-10 23:54 - Toshi MARUYAMA

- Subject changed from Great svn problems with Upgrade from redmine 1.0.5 to 1.2.1 to reposman: Great svn problems with Upgrade from redmine 1.0.5 to 1.2.1

- Category set to SCM extra
