**Description**

Example:

page "Test"

```
h1. Test

(see [[Test#Configuration|configuration]])

h2. Configuration

To configure view use these methods:
```

Export to HTML:

```
<h1 >Test<a href="#Test" class="wiki-anchor">&para;</a></h1>

    <p>(see <a href="configuration.html" class="wiki-page">configuration</a>)</p>

    <a name="Configuration"></a>
<h2 >Configuration<a href="#Configuration" class="wiki-anchor">&para;</a></h2>

    <p>To configure view use these methods:</p>
```

But expected result should contain

```
<a href="#Configuration" class="wiki-page">
```

instead of

```
<a href="configuration.html" class="wiki-page">
```
