<b>Target version:</b>		<b>Affected version:</b>	1.2.1
<b>Resolution:</b>			
<b>Description</b>			
In the (generic) application.css: #header { height:... padding:... }			
One solution: remove the height attr. and replace the 0 padding-bottom to such height (e.g. 2em) that the absolute-positioned main-menu bar can have its room.			
Now the header has a nice default look and can also expand flexibly for multi-line breadcrumbs.
