

Redmine - Defect #9098

Updating issue via RESTful WS don't update activities page

2011-08-22 12:37 - pasquale [:dedalus]

Status:	New	Start date:	2011-08-22
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	REST API	Estimated time:	0.00 hour
Target version:		Affected version:	1.2.1
Resolution:			
Description			
When I update some issues via REST API (specifically status and a numeric custom field), Redmine don't store this action in activities page			

History

Are you sure this isn't an Activity ETag issue (see [#8889](#)) ?

#2 - 2011-08-22 14:25 - pasquale [:dedalus]

how I can check this?

#3 - 2011-08-22 15:24 - Etienne Massip

Add a &foo parameter to your activity query URL, clear your browser cache, refresh with Ctrl+F5 / Ctrl+R.

Nothing changes: it's unrelated issue

#5 - 2011-08-22 15:28 - Etienne Massip

And in issue history ?

#6 - 2011-08-22 15:34 - pasquale [:dedalus]

Etienne Massip wrote:

And in issue history ?

Issue history work fine

#7 - 2011-08-22 15:54 - Etienne Massip

What are:

- the "Last Modified" timestamp of the activity page (in page properties)
- the timestamp of the modification in the issue history ?

Did you try without plugins ?

The point is that I have created a different admin account to manage a C# application via REST_API that changes status and a single custom field for different issues: if I make a login via web browser using this "REST-API account", I see the activity page of this identity void: I suspect that REST-API forgot to update some thing?

Did you try without plugins ?

yes, nothing changes

#9 - 2011-08-22 17:04 - Etienne Massip

Could you attach some screenshots : issue_history, empty activity page ?

#10 - 2011-08-22 17:14 - pasquale [:dedalus]

- File *issue_history.png* added

- File *empty_activity_page.png* added

Etienne Massip wrote:

[issue_history.png](#)

[empty_activity_page.png](#)

#11 - 2011-08-22 17:17 - Etienne Massip

There is no Projects block in the user profile page?

#12 - 2011-08-22 17:24 - pasquale [:dedalus]

no, because "beralios" is an identity used only via REST-API: isn't necessary to show it into members list that is displayed via web browser

#13 - 2011-08-22 17:30 - Etienne Massip

Meaning it is a project member but it is not displayed in this page or it is not a project member?

#14 - 2011-08-22 17:36 - pasquale [:dedalus]

isn't member of any project
