Description			
Hello Jean-Philippe!			
I saw the project description is textilized on project overview page, but not textilized elsewhere. Also formatting toolbar is missing on settings page above description field.			
I think textilizable welcome text would be also useful.			
These are small things so I've made a patch. Attached.			
BR, Balazs			

History

#1 - 2007-08-17 07:44 - Jean-Philippe Lang

Hi,

Project description are now textilized on projects lists and home page (rev 651). Welcome is also textilized now (rev 652).

I had to make small changes to ApplicationHelper#textilizable so that wiki and changesets links work when not inside the project (eg. on projects list).

#2 - 2007-08-17 08:57 - Balazs Dan

Thx. I've forgotten to check links, that's why it is missing from my patch. Sorry.

#3 - 2008-01-25 17:06 - Warren Harris

I've noticed this in the following case:

Under projects/list_documents page, documents are listed with a preview of their descriptions. However, the descriptions are not textilized. When the description is shown under the documents/show page, it is correctly textilized.
