Description

For administering the wiki and keeping it up to date, it would be nice to list

1. all "missing" pages (pages that are linked to somewhere but don't exist; e.g. page A links to B, but there is no B-page)
2. all "orphaned" pages (pages that are not linked anywhere, e.g. there is a page A, but no other page in the whole wiki contains a link to A)
