Redmine - Defect #912

Bulk edit functionality is unintuitive

2008-03-21 16:20 - Rocco Stanzione

Status:	Closed		**Start date:**	2008-03-21
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Issues		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Fixed		**Affected version:**	

Description

How to select issues to bulk-edit is intuitive and documented in the wiki. What to do next (how to actually perform the edit action) I can't figure out at all, and there's no info in the commit message (r1130) or the wiki.

History

#1 - 2008-03-24 08:25 - M T

Have a look at the notes in issue #607 regarding changes made to the way this works, (and why).

#2 - 2008-03-24 16:33 - Rocco Stanzione

- File toggle_selections.diff added

That makes sense. My remaining wish, then, is to have the pencil icon toggle selections rather than bulk check/uncheck. That way if I want to, say, select all but one or two items, I can select 2 and hit the toggle to reverse my selection. Attaching a patch to achieve that.

#3 - 2008-05-01 10:56 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Fixed

It's now documented in the wiki: RedmineIssueList.

> if I want to, say, select all but one or two items, I can select 2 and hit the toggle to reverse my selection

I find more natural to select them all, then uncheck 1 or 2 items.
I prefer to keep the current behaviour. This is the one I see most of the time in web apps.
