

Redmine - Feature #9195

Fetch issues associations with issues in /issues query

2011-09-06 16:57 - John Karman

Status:	New	Start date:	2011-09-06
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	REST API	Estimated time:	0.00 hour
Target version:			
Resolution:			
Description I am trying to get all the information from an issue and are actually mostly interested in the relations. I am building a visualizer for redmine. In order to be able to get the relations in an effecient manner, it would be nice if [HOST]/issues.xml?limit=25&project_id=redmine&offset=0&include=relations&key=[YOURKEY] also returned the relations. Now I need to thet the full list and then ask the server again for the relations.

Hmm...I could not add relations myself...
This is linked to
<http://www.redmine.org/issues/9188>
That was closed as it was not a bug but a feature request.
