Description

Today I can't delete a role, when there are useres assigned to this role.

There is an error message *Diese Rolle wird verwendet und kann nicht gelöscht werden.* (Role in use, can not delete).

Currently (Redmine 1.2.1) there is no information about assigned users.
This information could be added in the *role overview*.

And there should be an option to delete a role with the option to assign users to a different one instead.

I'm using Redmine 1.2.1
