Redmine - Defect #9220

enabled related project changeset reference

2011-09-10 00:55 - Takashi Okamoto

Status:	Closed		**Start date:**	2011-09-10
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	SCM		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	1.2.1

Description

Hi,

I would like to update ticket by commit for related project(parent or child).

While check changesets.rb, I aware such code exists:

```
def find_referenced_issue_by_id(id)
  return nil if id.blank?
  issue = Issue.find_by_id(id.to_i, :include => :project)
  if issue
    unless issue.project &&
            (project == issue.project || project.is_ancestor_of?(issue.project) ||
             project.is_descendant_of?(issue.project))
      issue = nil
    end
  end
  issue
end
```

However ":include => project" condition seems to prevent following code.

Why don't you permit referencing changesets for related project's scm?

regards,

Takashi Okamoto

Don't understand, is this really a defect or should you ask your question in Development forum?

:include option allows early (join) fetch of Issue.project property, AFAIR.

- Status changed from New to Resolved

Sorry, I'm quite a new for RoR. And I didn't understand the code.

I found related tickets work without any modification.

thanks,

Takashi Okamoto
