

## Redmine - Defect #9222

### non-breaking space prevents wiki parsing

2011-09-10 19:00 - Robert Hailey

<b>Status:</b>	New	<b>Start date:</b>	2011-09-10
<b>Priority:</b>	Low	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Text formatting	<b>Estimated time:</b>	0.50 hour
<b>Target version:</b>		<b>Affected version:</b>	1.2.1
<b>Resolution:</b>			
<b>Description</b>			
<p>I noticed this when copying an email into a bug report, it took me a while to figure out why the wiki formatting for the hash sign was not being applied. Apparently some mail clients really like non-breaking spaces.</p> <p>I would suggest translating all such chr(202) into normal spaces chr(32) at a high level.</p> <p>If tabs are also an issue (checking with this), maybe there is just a regex somewhere that needs to be updated.</p> <ol style="list-style-type: none"><li>Regular hash-wiki<ul style="list-style-type: none"><li>## Hash followed by non-breaking space</li><li>1. Hash followed by a tab character</li></ul></li></ol>			

#### History

#1 - 2022-01-06 21:54 - Jonathan Cormier

Just ran into this same issue, copying from an email that contained a non breaking space right before the #.
