Redmine - Defect #9222

non-breaking space prevents wiki parsing

2011-09-10 19:00 - Robert Hailey

Status:	New		**Start date:**	2011-09-10
Priority:	Low		**Due date:**

Category:	Text formatting		**Estimated time:**	0.50 hour
Target version:				
Resolution:			**Affected version:**	1.2.1

Description

I noticed this when copying an email into a bug report, it took me a while to figure out why the wiki formatting for the hash sign was not being applied. Apparently some mail clients really like non-breaking spaces.

I would suggest translating all such chr(202) into normal spaces chr(32) at a high level.

If tabs are also an issue (checking with this), maybe there is just a regex somewhere that needs to be updated.

1. Regular hash-wiki
     ## Hash followed by non-breaking space
        1. Hash followed by a tab character

History

#1 - 2022-01-06 21:54 - Jonathan Cormier

Just ran into this same issue, copying from an email that contained a non breaking space right before the #.
