

Redmine - Defect #9252

Regression: application title escaped 2 times

2011-09-15 11:34 - Etienne Massip

Status:	Closed	Start date:	2011-09-15
Priority:	Normal	Due date:	
Assignee:	Toshi MARUYAMA	% Done:	0%
Category:	Code cleanup/refactoring	Estimated time:	0.00 hour
Target version:	1.3.0	Affected version:	1.1.0
Resolution:	Fixed		
Description Since of r6350 , ApplicationHelper#html_title returns an HTML escaped string, but the base layout escape it again. As a result, if you are watching issue which Subject field value is something like: <code>"error.log" is empty</code> You'll get this string in your browser title bar: Redmine - Issues #1234: "error.log" is empty			
Related issues: Related to Redmine - Feature #4796: Rails 3 support
