This is not an issue to me as long as we check regularly that there is no inappropriate updates.

Alex, please don't do test on real base!

I agree. Specifically the three pages named by Bintintan Andrei are publicly editable to encourage and/or ease improvements and additions. I am one of the several contributors who is regularly following the activity-stream produced by redmine.org.

Note: The "important" pages (like [Changelog](#), [CommercialOfferings](#), [Features](#), [Guide](#) etc.) are locked anyways.

I'll go through the rest of the wikipages to see if any other pages needs to be locked or unlocked. Therefor the assignment. Once complete, I'd recommend closure of this issue either with resolution fixed or won't fix.

- Status changed from New to Closed

- Resolution set to Fixed

I believe the an mostly open wiki is a good thing to encourage contributions from everyone. Some important pages are currently locked and I believe this list is exhaustive.
