<b>Resolution:</b>	Duplicate		
<b>Description</b>			
<p>If we have one project "Project A" with one tracker "Bugs" (with custom fields) and another project "Project B" with one tracker "Support" (with custom fields), redmine fail to copy issue from "Project A" to "Project B". Will be very nice if redmine copy issue.</p> <p>If we have different list of custom fields, just skip custom fields which are missing in target.</p> <p>I can patch this and attach code with tests for this.</p>
