

Redmine - Defect #9350

Password reset for newly registered users not working

2011-09-29 14:39 - meinhard benn

Status:	Closed	Start date:	2011-09-29
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Accounts / authentication	Estimated time:	0.00 hour
Target version:		Affected version:	1.1.2
Resolution:	Fixed		
Description			
Reproduce: <ol style="list-style-type: none">1. Make sure users need to be activated by admin after signup (I don't have the config setting handy, sorry)2. Register new user3. Click "Lost password" at sign in and fill in email4. Click on link in email and enter new password5. Try logging in with new password, this won't work <p>This is not a defect I think, yet it would help if the user gets a warning like "Your account is not activated yet", if one tries to reset the password on a newly registered account.</p> <p>We are on v1.1.2, if this has been fixed in the meantime, please simply close this ticket.</p>

History

#1 - 2020-08-23 06:19 - Go MAEDA

- Category changed from *Permissions and roles* to *Accounts / authentication*
- Status changed from *New* to *Closed*
- Resolution set to *Fixed*

Fixed by [#14228](#) (Redmine 2.4.0).

After the change, Redmine displays a notice "Your account was created and is now pending administrator approval." when a pending user attempts to get a password recovery email.
