Redmine - Defect #9377

 is not inserted before macro in Wiki

Category: Text formatting Estimated time: 0.00 hour

Target version:

Resolution: Affected version: 1.2.1

Description

 tag is not inserted before macros in Wiki.

For example,

abc

!{{hello_world}}

should be converted to

abc
br />Hello world! Object: Journal, Called with no argument.

However, it is converted to

abc

Hello world! Object: Journal, Called with no argument.

Detail and cause:

 in Wiki is inserted by hard_break method in "lib/redmine/wiki_formatting/textile/formatter.rb".

This method replaces "\n" with "
" as follows:

```
text.gsub!( /(.)\n(?!\n|\Z| *([\#*=]+(\s|$)|[{|]))/, "\\1<br />" ) if hard_breaks
```

It seems that "[{|]" prevents insertion of "
" before CSS style and in table, because CSS style in Wiki starts with "{" and cells of table are separated by "|".

Macros in Wiki also start with double "{"s, so "
br />" is not inserted before macros.

I think that hard break method should be

```
text.gsub!( /(.) \n(?!\n|\Z| *([\#*=]+(\s|\$)|\{[^{]|\|}))/, "\l^{br}/>" ) if hard\_breaks
```

to replace "\n" before macros. Environment:

- Redmine version 1.2.1
- Ruby version 1.8.7 (patch 174)
- Rails version 2.3.5

It does, because GitHub repo is not an official one (check Contribute) and can potentially differ from the original source.

I think that Eric keep it up to date, though, but this may be not true.

Thank you for your reply, Etienne Massip.

I close the pull request in GitHub to avoid confusion.
