

Redmine - Defect #94

preview should probably POST instead of GET, breaking on long entries

Description

I was porting my wiki entries from Trac into redMine and noticed that on long entries the URL generated for the GET exceeded nginx's maximum length. This happened several times on long entries, POSTing should resolve the issue.

Kudos on the work, our company is looking to use redMine for all dept. project and issue management.

You're absolutely right.
The fix is committed in rev 658.

Thanks.
