<b>Description</b> I miss those features: 1. "softer" start and due dates of an issue (plus checkbox at them to make them "hard") 2. duration of an issue 3. more fine dependencies between issues 4. milestones (special issue type with no duration) 5. extra start and due dates of a project itself (but according <a href="#">#1</a> ) 6. more assigned people to an issue

Some of these features already exist in this tracker; if you need something specific, please first check that this hasn't already been requested and eventually create a ticket for each need with a precise description.

Thanks.
