|--|-------------|--------------------------|------------|
| Status: | New | Start date: | 2011-10-14 |
| Priority: | Normal | Due date: | |
| Assignee: | | % Done: | 0% |
| Category: | Attachments | Estimated time: | 0.00 hour |
| Target version: | | Affected version: | 1.0.1 |
| Resolution: | | | |
| Description | | | |
| After uploading a file whose name contains "_ _" and creating a link to the file using the "attachment:" syntax, no html link is generated after saving. | | | |

History

#1 - 2011-10-18 19:38 - Mischa The Evil

Confirmed on source:/trunk@7623.

#2 - 2011-10-18 19:41 - Mischa The Evil

- Subject changed from *Attachment links in wiki fail when the file names contain the syntax pattern "_ _"* to *Attachment links fail when the file names contain the syntax pattern "_ _"*

Note: this is not tied to the Wiki only. It also happens on other objects which can handle attachments. Therefor I've adjusted both the issue subject and description.

#3 - 2011-11-11 19:18 - Jean-Philippe Lang

As a workaround, you can use double quotes which works fine:

```
attachment:"test_ _test.txt"
```
