Category:			**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	

Description

If I run a User Activity Report, the results is produces are waay to big.
Typically this report is going to be ran monthly reporting on all users & the table is too wide to print & too wide to use.

If there was an export as csv option on the bottom of the screen then at least it could be dumped into a spreadsheet.
Or some styling allowing a zoomed out view, as it is just now i cant really use it

History

#1 - 2011-10-27 19:30 - Etienne Massip

Are you referring to some activity report pushing plugin?

#2 - 2016-08-29 03:23 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Invalid

Maybe this is plugin issue. There is no feature like described in Redmine core.
I am closing this issue.
