Redmine - Defect #9488

undefined method deprecate

2011-10-28 15:26 - Roman Hurtik

Status:	Closed		**Start date:**	2011-10-28
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	1.2.1

Description

I'm trying to install redmine on Debian 6.0.3 squeeze.
I followed the installation as described in http://library.linode.com/web-applications/project-management/redmine/debian-6-squeeze .
When I run "rake config/initializers/session_store.rb" all breaks with :
"rake aborted!

undefined method `deprecate' for #<Rake::Application:0x7fdc6a8a1bc0>".

Full error output :
rake config/initializers/session_store.rb --trace

(in /home/ronline/sd/support/www)

/var/lib/gems/1.8/gems/rake-0.9.2.2/lib/rake/file_utils.rb:9: warning: already initialized constant RUBY

/var/lib/gems/1.8/gems/rake-0.9.2.2/lib/rake/file_utils.rb:86: warning: already initialized constant LN_SUPPORTED

rake aborted!

undefined method `deprecate' for #<Rake::Application:0x7f154d099b60>

Any hints are welcome.

History

#1 - 2011-10-28 15:34 - Etienne Massip

Please give details according to [SubmittingBugs](#).

But, already, I can say that your Rake version does not match requirements (see [RedmineInstall](#)).

#2 - 2011-10-28 15:59 - Roman Hurtik

Txh for the replay Etienne.
Here are some more details.

Try rake generate_session_store as explained in [RedmineInstall](#).

Or rake _0.8.7_ generate_session_store to force use of a compatible Rake version.

#4 - 2011-10-28 16:13 - Roman Hurtik

rake generate_session_store
/var/lib/gems/1.8/gems/rake-0.9.2.2/lib/rake/file_utils.rb:9: warning: already initialized constant RUBY
/var/lib/gems/1.8/gems/rake-0.9.2.2/lib/rake/file_utils.rb:86: warning: already initialized constant LN_SUPPORTED
rake aborted!

Ok, you see that this is not the right Rake version which is ran, right?

Try with rake _0.8.7-2_ generate_session_store or rake _0.8.7.2_ generate_session_store, maybe?

#6 - 2011-10-29 18:57 - Script Head

> Try with rake _0.8.7-2_ generate_session_store or rake _0.8.7.2_ generate_session_store, maybe?

I am seeing the same problem, tried both of the above with no luck:

```
root@Redmine:/opt/redmine-1.2# rake 0.8.7-2 generate_session_store
(in /opt/redmine-1.2)
/var/lib/gems/1.8/gems/rake-0.9.2.2/lib/rake/file_utils.rb:9: warning: already initialized constant RUBY
/var/lib/gems/1.8/gems/rake-0.9.2.2/lib/rake/file_utils.rb:86: warning: already initialized constant LN_SUPPOR
TED
rake aborted!
undefined method `deprecate' for #<Rake::Application:0x7f8b866d8b48>
/opt/redmine-1.2/Rakefile:8
(See full trace by running task with --trace)

root@Redmine:/opt/redmine-1.2# rake 0.8.7.2 generate_session_store
(in /opt/redmine-1.2)
/var/lib/gems/1.8/gems/rake-0.9.2.2/lib/rake/file_utils.rb:9: warning: already initialized constant RUBY
/var/lib/gems/1.8/gems/rake-0.9.2.2/lib/rake/file_utils.rb:86: warning: already initialized constant LN_SUPPOR
TED
rake aborted!
undefined method `deprecate' for #<Rake::Application:0x7fd850485c80>
/opt/redmine-1.2/Rakefile:8
(See full trace by running task with --trace)
```

As you can see you don't use the syntax as given by Etienne. You must include the underscores in the commands.

#8 - 2011-11-01 00:14 - Roman Hurtik

I've tried the syntax given by Etiene => rake *0.8.7-2* generate_session_store.
It generate the same error as in note 5 and 7.

One thing looks weird, in my and even "Mischa The Evil" error log we have line /var/lib/gems/1.8/gems/rake-0.9.2.2.
What's the rake-0.9.2.2 doing here? My "dpkg -l | grep rake"
shwos 0.8.7-2...

I have also tried rake *0.9.2.2* generate_session_store => No luck.

#9 - 2011-11-01 01:36 - Roman Hurtik

I've removed the rake-0.9.2.2 version that was installed from Rubygems => gem uninstall rake.
I've installed the rails through the debian package manager "apt-get install rails".
When I run "rake generate_session_store" I get "Missing the Rails 2.3.11 gem. Please `gem install -v=2.3.11 rails`". I can't install the v=2.3.11
version coz it will reinstall rake-0.9.2.2. Apparently the solution seems to be to execute commande "gem install -v=xxxxx rails", where xxxx will be the
rails version with rake 0.8.7-2.

#10 - 2011-11-05 14:20 - Etienne Massip

- Status changed from New to Closed

- Resolution set to Invalid

```
gem install rake -v=0.8.7
gem install rails -v=2.3.11 (or 2.3.14)
rake _0.8.7_ generate_session_store
```

- Status changed from New to Closed

- Resolution set to Invalid

```
gem install rake -v=0.8.7
gem install rails -v=2.3.11 (or 2.3.14)
rake _0.8.7_ generate_session_store
```
