

## Redmine - Defect #949

### Style not applied to wiki image

2008-03-28 23:06 - Wes Billman

<b>Status:</b>	Closed	<b>Start date:</b>	2008-03-28
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Attachments	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Affected version:</b>	
<b>Resolution:</b>	Wont fix		
<b>Description</b> Wiki images should resize.  Often I add large screen shots to wiki pages and it would be great to be able to specify a size (either globally or per image) of a thumbnail. So that inline wiki images would not fill the full wiki page.  Forgive me if this is a duplicate, I did a quick search but didn't find anything.			
<b>Related issues:</b> Related to Redmine - Feature #2416: {background:color} doesn't work in text f... Has duplicate Redmine - Feature #4453: Fully implement Textile Has duplicate Redmine - Defect #7395: Attached images don't resize			

#### History

##### #1 - 2008-05-14 14:40 - Rachel Majchrzak

+1

##### #2 - 2008-05-21 02:19 - Chris Pitzer

Agreed. Something like...

```
!image.png!
```

...displays a normal image, and...

```
!size(width,300,image.png)!
```

...displays an image at 300px width. And by default clicking a resized image should link to the full sized image. (the resize could just be the normal image with width="300" on the html tag, or it could be resized server side... but the syntax remains the same.)

As I put all my design notes up on the wiki, having thumbnail capacity would be really really helpful for me. Waiting for a half dozen images to load all the time sucks.

##### #3 - 2008-06-02 04:29 - dop in

+1

##### #4 - 2008-07-03 17:38 - Marcello Henrique

+1

##### #5 - 2008-07-03 17:51 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Fixed

The syntax is:

```
!{width:300px}image.png!
```

I'll add it to the doc.

##### #6 - 2009-01-15 08:57 - Anh Kỳ Huỳnh

- Status changed from Closed to Reopened

My site is using Redmine 080. The parameter {width:...} doesnot work anymore.

**#7 - 2009-01-27 15:05 - Alexey Lustin**

Kỳ Anh Huỳnh wrote:

+1

in my testing portal work on Redmine **trunk** version width does't work too

i have tried to set the width of atached image and to image with url - same result - does't render

**#8 - 2009-02-13 11:02 - Martin Eckhardt**

+1

Same at my company. A user tried to resize an image without success. We tried both url + attachment. Its rather annoying to resize it by hand.

**#9 - 2009-02-26 10:25 - Jérémie Delaitre**

I'm using redmine trunk and it does not work too...

**#10 - 2009-03-02 12:58 - Nicklas Holm**

Not for me either...

**#11 - 2009-05-26 09:58 - Franc Marx**

after update to Redmine 0.8.0 picture resize doesn't mork anymore

```
"!{width:300px}picture.jpg!"
```

**#12 - 2009-06-18 06:11 - Andy Wiltshire**

Franc Marx wrote:

after update to Redmine 0.8.0 picture resize doesn't mork anymore

[...]

Agreed. We really need to be able to resize images. How hard is it to integrate some sort of autothumbnail or resizer? Formatting of posts/messages is lacking a bit for what we want to do.

**#13 - 2009-07-09 23:34 - Cyber Sprocket**

+1

!{width:300px}image.png! does not work on latest production release Redmine 0.8.4.stable.2769 (MySQL)

**#14 - 2009-07-10 09:17 - Andrew Chaika**

Franc Marx wrote:

after update to Redmine 0.8.0 picture resize doesn't mork anymore

Just comment (or remove) in wiki\_formatting\textile\formatter.rb line:

```
self.filter_styles=true
```

**#15 - 2009-07-11 00:52 - Mischa The Evil**

Andrew Chaika wrote:

Be aware that this "hack" can make Redmine vulnerable to XSS-attacks. See [#2416](#) for the whole story.

HTH...

**#16 - 2009-11-20 03:50 - Michael Koch**

+1 on adding the ability to resize images. we have had a lot of people complain about this. will it be fixed? ever? or is the security issue to relevant?

**#17 - 2009-11-22 14:37 - Mischa The Evil**

- *Resolution deleted (Fixed)*

**#18 - 2009-11-24 17:22 - Antti Kaijanmäki**

+1, anyone working on this?

**#19 - 2009-12-20 16:13 - Jean-Philippe Lang**

- *Subject changed from Wiki Image Resizing to Resizing attached image*

- *Category changed from Wiki to Attachments*

**#20 - 2010-01-27 18:31 - Tiago Alves**

+1

While this isn't solved I added this CSS snippet to our theme's application.css stylesheet:

```
#content .wiki img {  
  max-width: 98%;  
}
```

This resizes images that are larger than the wiki page itself.

**#21 - 2010-03-08 08:39 - Enterux Solutions**

+1

Any updates to this issue. I've redmine 0.9.2 Setup. Does every thing i want. Needs this feature to make wiki pages look good. Should be like we get to see the full size image when clicked on the resized image.

**#22 - 2010-03-08 19:33 - Kamil .**

Maybe image should automatically fit to wiki page size?

**#23 - 2010-03-19 15:50 - Jason Mitchell**

+1

Extremely annoying. Any hope of correcting this or is the intent to use the plugin described in [#3510](#)?

**#24 - 2010-08-17 02:33 - Rocco Stanzione**

The behavior appears (from code and comments) to be a security feature intended to help protect public sites. You can change it back to the old behavior by commenting out this line:

`self.filter_styles=true`

in the initialize method of Redmine::WikiFormatting::Textile::Formatter in `lib/redmine/wiki_formatting/textile/formatter.rb`

**#25 - 2010-08-29 23:11 - jon hertzig**

If you're willing to change the "`self.filter_styles=true`" line in `wiki_formatting\textile\formatter.rb` (and allow the XSS vulnerability), you can dummy a thumbnail by " `&lt;img.png&gt;`";<URL for attachment>

**#26 - 2010-08-29 23:13 - jon hertzig**

jon hertzig wrote:

(should be:)

```
" !{width:200px}<image.png>!":<URL for attachment>
```

**#27 - 2010-09-03 17:47 - James Rowe**

+1

is there a suggested donation to commence work on this feature?

This is a huge annoyance for us. We don't want to lose resolution on screen captures, but want to include them in the wiki.

Request tracker (other system that we plan on moving away from) will take the attached image and fit it nicely within the comment; a la maxwidth:98% kind of css.

Indeed, it appears with [r2192](#) which fixed security issue #2377 together with [r2170](#), concerning possibility to inject JS in page code.

I close this one sine it's not a defect in favor of [#1006](#).

**#59 - 2011-10-27 19:18 - Etienne Massip**

- *Target version deleted (Candidate for next minor release)*

**#60 - 2012-02-14 07:41 - Etienne Massip**

BTW, width and height styles are allowed again, see [#2416](#).

**#61 - 2012-02-28 15:43 - Gary Ritchie**

Etienne Massip wrote:

Not working for images. Appears to be only for text formatting in [r8860](#).

**#62 - 2012-06-25 22:14 - rm user**

lol, 4 years and closed without a fix!!

what a shame...

I've used [http://www.redmine.org/plugins/redmine\\_lightbox](http://www.redmine.org/plugins/redmine_lightbox) very nice plugin for attachments on the issues, but it doesn't work for images posted in the redmine..

Any idea how to make a plugin which will parse ALL images pasted into redmine and make them work as the lightbox plugin? (i.e. images posted in one comment to work like lightbox on attachments).

simple testcase:

Zb9j0.jpg  
as you can see it kills the page completely! really need a solution urgently..

**#63 - 2012-06-25 22:15 - rm user**

- *Status changed from Closed to Reopened*

**#64 - 2012-06-26 00:02 - Jean-Philippe Lang**

- *Status changed from Reopened to Closed*

You can now use inline styles:

```
!{width:400px}http://i.imgur.com/Zb9j0.jpg!
```

Displays:

Zb9j0.jpg

#### #65 - 2012-06-26 00:53 - rm user

- Status changed from Closed to Reopened

Sorry, but it's really not comfort at all :( How can I get full-size picture? I need to add additional link etc.. Whilst I just want to add an image and click on it to get it full-size.

I'd strongly suggest auto-resizing images automatically via JavaScript.

So when you click on the image you get it in the full-size in a window while other elements on the pages are hidden. After clicking again you get back.

I have very low skill in JS and I don't know what actually redmine uses in terms of JS, but I just did some JS hacking in my theme to get it working exactly like that!

I will share my work bit later when cleanup it a bit. Really need this to be integrated into the redmine.

Also displaying attachments as thumbnails with lightbox would be a very good feature and would bring redmine to the next level of SCM.

#### #66 - 2012-06-26 01:47 - rm user

- File `image_resize_classic_redmine_theme.diff` added

So, here is the patch for classic Redmine 1.3 theme (I'm not sure if it was changed in recent editions):

<http://pastebin.com/YnneMifB>

For default redmine theme the algorithm of patching is the same

JS code goes into `javascripts/theme.js` and CSS code into `stylesheets/application.css`.

It's a bit hacky solution because it replaces all `<img>` tags without onclick action defined and resizes all wiki images automatically to 500px, on click you get a full-size image.

I'm not an expert of JavaScript or Ruby so can't really say how to apply this onclick event to only wiki/issue images.

Also attached it in case pastebin fails.

#### #67 - 2012-06-27 00:07 - Jean-Philippe Lang

- Status changed from Reopened to Closed

Please don't reopen this issue that was about being able to apply inline styles.  
Have a look at [#1006](#) instead.

#### #68 - 2012-06-27 10:35 - rm user

Jean-Philippe Lang wrote:

Please don't reopen this issue that was about being able to apply inline styles.  
Have a look at [#1006](#) instead.

I understand what you're saying, but it's a bit different issue, because it's about attachment whilst this issue is about images posted into any message body (i.e. in forums/wiki/issues).

Anyways I see nobody seems to care about this much, so I just resolved this with dirty workaround.

#### #69 - 2012-08-29 18:56 - Chris Wilson

I don't want thumbnails, which is what [#1006](#) is about.

I want sensibly sized images, with borders, in my pages. I want to be able to apply arbitrary styles to images, as supported by Textile.

This is on a private site, so I don't care about XSS. I would at least like an option to disable the filtering, so that we have the full power of Textile.

Please, please reopen this issue.

#70 - 2015-09-09 18:49 - Alex Dergachev

For anyone who stumbles across this old issue, if you want "sensibly sized images, with borders", with clicking to see full-size, check out this mini plugin we've been using for years. [https://github.com/evolvingweb/redmine\\_thumbnail\\_embed](https://github.com/evolvingweb/redmine_thumbnail_embed)

#71 - 2015-09-09 22:00 - rm user

Alex Dergachev wrote:

[https://github.com/evolvingweb/redmine\\_thumbnail\\_embed](https://github.com/evolvingweb/redmine_thumbnail_embed)

as far as i understood it's just a plugin to make thumbnails of images via special tag

```
{{thumbnail}}
```

or so

so it means i need to edit all previously linked images to display them properly on pages.

instead just apply my solution (patch redmine's theme) so on any page images will be automatically resized and give you full size image if you click on the image.
