Did you set config.action\_mailer.default\_url\_options: <http://api.rubyonrails.org/classes/ActionMailer/Base.html>?

Try it, set in enviroment.rb  
config.action\_mailer.default\_url\_options = { :host => "name\_of\_my\_server" }  
Restart apache, but had no sucess :(

Resolved.

The error was because i put the protocol http in Hostname and path settings, I wrote [http://my\\_server](http://my_server) instead of my\_server (without protocol)
