Description

There is already an option that export the filtered issues, but I want export every filtered issues details.
I can do it for each issue one by one (enter in issue details, then click pdf)
I wish I can do it for every issues filtered.

History

There is one plugin: show_descriptions that shows the issue description in the issue list with filtering (a bit bugy but OK)
but using this plugin and press "PDF" it renders a normal issue view.
