Category:	Project settings	**Estimated time:**	0.00 hour
Target version:			
Resolution:		**Affected version:**	

Description

Performance is degraded when a Project has more than 900+ users assigned to it.

Steps to Reproduce:
1) Login into Redmine (with permissions to create a project and assign members to it)
2) Create a Project and assign users (900+) users to it.
3) Once the Project is created, click on Settings tab.
4) It takes more than 90seconds to load the page.

Not sure whether this issue has been raised earlier (as I could not found any). Please provide me with your inputs.

Redmine version: 1.2.1
Ruby version: 1.8.7
Rails version: 2.3.11

History

#1 - 2012-07-17 02:44 - Xaviar S

```
+1 850+ users assigned to multiple projects here and each project the settings page takes 2+ minutes to load.
Perhaps a pagination of the users instead of listing them all?
```

Redmine version 1.4.4
Ruby version 1.8.7
Rails version 2.3.4
