Redmine - Feature #9550

Include Updated By and Update Date Time in Issue List(s)

Description

I am involved in multiple issues at the same time, some as a Watcher and some as the person Assigned. In both cases I am frequently waiting for additional information to be added to the Issue by other users.

It would be very helpful to me if I could see when then issue was last updated, and by who, because that would show me which issues I needed to check in detail.

Another way of meeting the same goal would be to change the Activity view so that in addition to the current filters (Issues, Changesets, News, etc.) there was a check box to say "Only issues I am involved with" that limits the view to issues I am assigned, or watching, or created.

Is duplicate of Redmine - Feature #6375: Last updated by colum in issue list	**Closed**	**2010-09-12**

History

#1 - 2011-11-11 08:51 - Roger Hunwicks

I've tried doing this with a saved filter on the Issues list, but I don't know if it is possible to do an OR query. Without this, I have to have 3 separate Saved Queries, for Issues I created, Issues assigned to me, and Issues I'm watching.

Therefore, another way of meeting my requirement would be to have a filter option called *Involving* with the same *<<me>> or a specific user* select list as Assigned to, etc. but which checks across all the ways a person can be involved in an issue: Reporter, Assignee, Watcher, etc.

Currently we already have the 'Updated'-column available in issuelists which shows the date/time of the last change of the issue (with some confirmed defects though, see #5354). This is even provided by Rails itself IIRC.
What we don't have is a column which shows the author of the last change to the issue. Though, for that we already have feature-request #6375.

Based on the above, closing as a duplicate of #6375.
