

Redmine - Patch #9563

PATCH: Add per-tracker global cc for issue creation and update notifications

2011-11-14 00:12 - Alex Hornung

Status:	New	Start date:	2011-11-14
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Email notifications	Estimated time:	0.00 hour
Target version:			
Description			
Hi,			
at DragonFly BSD we are migrating the bug tracker from roundup to redmine. We have a setup where the bugtracker is deeply integrated with two mailing lists, bugs@ and submit@. As such, we like updates on issues going to their respective mailing list.			
The attached patch adds a per-tracker CC email address to which all updates to that tracker (both new issues and updates/edits) will be sent to.			
Cheers, Alex			

History

#1 - 2011-11-14 01:59 - Alex Hornung

- File *redmine_use_author_name_in_cc_from.patch* added

This second patch I have attached additionally sends out the name of the user who modified / added the issue in the From: field of the mail. This is very much desirable in a mailing list setup like ours. The patch is incremental, on top of the previous one.

Cheers,
Alex

#2 - 2018-01-28 12:28 - Antonio Huete Jimenez

Hi,

We're still using this modification to allow our trackers to send to different recipients. We haven't found a way of doing this with "Custom fields" either. Would you please review the patches?

Thanks,
Antonio Huetes
