

Redmine - Feature #9565

Gantt graph grouped by "assigned to"

2011-11-14 17:48 - Christian Kranabetter

Status: New	Start date: 2011-11-14
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: Gantt	Estimated time: 0.00 hour
Target version:	
Resolution:	
Description	
<p>Hi,</p> <p>The issue board is very nice to use. Now I am trying to use typical project management functions.</p> <p>Your gantt view is simple but useful. But for ressource management a 2nd view would be useful.</p> <p>All Issues filtert grouped by assigned user.</p> <p>This is possible in issue list. Changing to gantt there is only the filter available.</p> <p>It would be nice to have such a feature.</p> <p>So you are able to see all filtered issues (and its relations) of a all users sorted by assigned user</p>

In the gantt view it also would be nice to have an quick and printable information about the assigned user (configurable, cause not everybody has this need).
