

Redmine - Defect #9576

403 forbidden on attachments, after upgrade to 1.2.0, 1.2.1 and 1.2.2

2011-11-15 10:46 - Stéphane Liabat

Status:	Closed	Start date:	2011-11-15
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Attachments	Estimated time:	0.00 hour
Target version:		Affected version:	1.2.2
Resolution:	Duplicate		
Description From an 1.1.0 fully fonctionnal. I have upgrade from version 1.1.0 to 1.2.0 yesterday. Everythings work fines, except the files attachments. We can see the attachments section, but we can't download them (files), neither delete them : 403 forbidden page. I have test with 1.2.1 and 1.2.2, and it's the same effect. I have check the rights and nothing was changed.

plugins : just one, wiki_extensions, but i have desinstalled him, and same problem.

#4 - 2011-11-15 16:16 - Etienne Massip

Did your database migration went smoothly?

#5 - 2011-11-15 16:36 - Stéphane Liabat

Yes, no errors with the migration script.

- Category set to Attachments

- Affected version (unused) set to 1.2.2

- Affected version set to 1.2.2

#7 - 2011-11-15 20:32 - Jean-Philippe Lang

- Resolution set to *Cant reproduce*

#8 - 2011-11-16 08:56 - Etienne Massip

Is this tied to the activation of the issue tracking module in the project settings as reported in [#9055](#) and [#9360](#)?

Is this tied to the activation of the issue tracking module in the project settings as reported in [#9055](#) and [#9360](#)?

Yes !

I have read the 9055, i have check 'issue tracking' in project, and now i can download files.

so it's clearly a major bug. I have test with 1.2.0.

I will stay in 1.1.0 until this bug correct, beacuase, we don't use the issue tracking system, and i don't want to enable issue tracking, just to permit download.

so, stay this bug alive :)
