Description

database: postgres 9.0.5
ruby: 1.8.7 (x86_64-linux)
rails: 2.3.11
redmine: 1.2.1.stable

Created a "User" type custom field for Issues.
This field does not show up in the "Group results by" dropdown in the issue query screen.
Had to convert the custom field to a "List" type then it showed up in the group by list.
