<b>Resolution:</b>			

#### Description

The controller\_timelog\_edit\_before\_save hook is available in several of the TimelogController's methods. However, since TimeEntries can be created when updating an Issue, I found myself needing the same hook in IssuesController.new().

There is no hook in IssuesController.new() that lets plugin developers work with the TimeEntry.

I've attached the proposed hook-addition as one patch, and additionally a patch containing the plugin that utilizes it as an example.

I realize that it might be bad practice to have a hook named 'controller\_timelog\_\*' outside of the TimelogController, but I think it makes sense to be able to use the same hook, as the plugin demonstrates.

#### History

##### #1 - 2011-12-05 21:52 - Max Haventon

The patch assumes Redmine @ [r8004](#).
