Target version:			
Resolution:			
Description <p>In the Email notifications settings tab, there are options for choosing what actions will generation an email notification. For "Issue updated" action, there's currently three sub action filters - "Note added", "Status updated", and "Priority updated".</p> <p>It would be useful for our teams' use case that a sub action filter for "Category updated" be added.</p> <p>We have many issues already in our database, and sometime in the middle of our project, we would like to categorize our issue in a different way. Currently, this would generate tons of emails for our developers.</p> <p>I can help to develop a patch for this feature if the maintainers think this feature is worth going into the main trunk. Thanks!</p>
