

Redmine - Defect #9777

Wiki upgrade page contains outdated information

2011-12-12 10:39 - Holger Baumhaus

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:	Documentation	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Fixed		
Description			
The wiki upgrade page http://www.redmine.org/projects/redmine/wiki/RedmineUpgrade contains the following information			
Also remember that Redmine 1.2.x uses Rails 2.3.11, so you will need to upgrade your Ruby on Rails gem:			
<pre>gem install rails -v=2.3.11</pre>			
However, during upgrade you receive an error:			
<pre>(in /var/lib/redmine) rake aborted! RubyGem version error: rails(2.3.5 not = 2.3.14) /var/lib/redmine/Rakefile:4:in `require' (See full trace by running task with --trace)</pre>			

History

#1 - 2011-12-12 11:15 - Etienne Massip

Which Redmine version did you install? [1.3.0](#)?

If yes, then you should install Rails 2.3.14 rather than 2.3.11, see [requirements](#).

If not, please give details according to [SubmittingBugs](#) and run rake with --trace.

#2 - 2011-12-12 11:27 - Holger Baumhaus

Yes, I did the upgrade to 1.3.0.

It is correctly listed in requierementes, however the upgrade wiki page just contains outdated information. So, somebody with wiki page edit permissions just has to edit the page. Nothing more. ;-)

#3 - 2011-12-12 13:15 - Holger Baumhaus

- Status changed from New to Resolved

- % Done changed from 0 to 100

#4 - 2011-12-12 14:32 - Etienne Massip

- Status changed from Resolved to Closed

- Resolution set to Fixed
