#6 - 2012-01-11 05:36 - Leon Guan

I am having the same issue in WIKI pages, if the wiki link is constructed by UTF-8 characters, such as Chinese, the linked wiki page will result in error 500, and check the error log it has the incompatible issue on translation. For those pages with links in LATIN, they worked fine, even the contents are with UTF chars.

Merged.

Leon, please open a separate issue if your problem still persists.
