History

#1 - 2011-12-16 10:12 - Anonymous

The error is in file **revision_graph.js** line 31. In my case var **cw** is every 40.

Had the same effect until I refreshed my changesets. Try to remove and then readd the repo, worked for me

I did and the result was the same. Shouldn't it look like more of a revision graph and less of a bullet pointed list? (tested on Mac Chrome 17.0.963.12)

I expanded the X spacing in the JS and still get a similar thing.

May be i will help. This bug is only for old commits (before redmine update). After update the branch graph is ok.

UPD. I wrong.

I can reproduce the behaviour quite easily. It seems that when there is not enough branches to increase the horizontal width the words are cut off.

Attached a fix that works fine for me. It changes the width dynamically if there's not enough room to draw the tag names. Against 1.3.2.

BTW, the way the graph is integrated into the revision list has been changed with [1.4.0](#).

We removed the head revision branch names since they will necessarily be cut off and display them on revision dot hover.

There is still room for improvements, though.

Yeah I know, but I needed a quick fix for the stable version, so I thought I share it :)

Thanks for patching this bug

It looks like that the defect go away (i can't reproduce it with the last 1.4 version). Could anyone close the ticket?

Fixed when changed the way the visual tree is displayed for [1.4.0](#).

- Target version deleted (Candidate for next minor release)
