

Redmine - Defect #9832

Revision graph height should depend on height of rows in revisions table

<b>Description</b> The new revision graph from <a href="#">#5501</a> is nice and looks fine - at least on the default theme. However, it doesn't behave well when displayed using many of the existing third party themes.  At the very least the graph should adapt to the actual height of the rows of the revisions list instead of blindly assuming a hardcoded value of 20 pixels.  The attached patch fixes this.
