

Redmine - Defect #9832

Revision graph height should depend on height of rows in revisions table

2011-12-18 11:55 - Jakob Skjerning

Status: Closed	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: SCM	Estimated time: 0.00 hour
Target version: 1.3.1	Affected version: 1.3.0
Resolution: Fixed	
Description	
<p>The new revision graph from #5501 is nice and looks fine - at least on the default theme. However, it doesn't behave well when displayed using many of the existing third party themes.</p> <p>At the very least the graph should adapt to the actual height of the rows of the revisions list instead of blindly assuming a hardcoded value of 20 pixels.</p> <p>The attached patch fixes this.</p>
