**Description**

Hi folks (and merry Christmas) !

I am trying to get issue categories via REST this way :

> http://host.com/redmine/projects/8/issue_categories.xml?key=somekey

But everything I get is a 403. The weird part is that :

> http://host.com/redmine/projects/8.xml?key=somekey

works perfectly with <u>exactly</u> the same key. Is there something I missed ?

Thank you in advance,

*- Status changed from New to Closed*

*- Resolution set to Invalid*

Sorry, please ask questions in forum.

This one looks like a permission issue, even listing issue categories requires the user to be a member of the project (source:/trunk/lib/redmine.rb#L61 ).

(and merry Christmas to you too =)).
