

Redmine - Defect #9894

Issue category is not created for the project if we try to create it via ajax on adding new issue page.

2011-12-30 09:33 - Y Z

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	1.3.0
Resolution:	Cant reproduce		
Description			
Issue category is not created for the project if we try to create it via ajax on adding new issue page.			
When we click on plus icon to add a new category, specify category name, click on the OK button, the dialog closes w/o adding a new category for the project.			
Everything is tested with Administrative privileges. But the process works if we add new category through Project -> Settings -> Issue categories tab.

- Status changed from New to Closed

- Resolution set to Cant reproduce

Can't reproduce on m.redmine.org with 1.3.0 stable, could be a setup issue (can you add a related issue to an issue?) or a plugin issue?

You should also check your production.log file.

#5 - 2012-01-04 14:37 - Y Z

Found a cause. There is a plugin called "fields permissions" http://www.redmine.org/plugins/redmine_fields_permissions, it breaks almost all features designed through _attributes view.
