#### Description

Got 404 when trying to delete attached file in wiki section.

I have two separate hosts running similar environment, with 1.3.0 Redmine's, trunk changeset 8228

```
Processing AttachmentsController#398 (for 59.120.172.71 at 2012-01-01 08:18:53) [POST]
  Parameters: {"action"=>"398", "authenticity_token"=>"7pqBjXluQaYfW07miFv54fCCZs6gJoaaJ8Oq6mfKluw
=" , "controller"=>"attachments"}
Rendering template within layouts/base
Rendering common/error (404)
Filter chain halted as [:find_project] rendered_or_redirected.
Completed in 134ms (View: 114, DB: 9) | 404 Not Found [http://dev.xdevs.com/attachments/398]
```

Same problem exist on both hosts.

Any ideas how to fix this issue? I tried on online redmine demo - no issue detected, but it's trunk version seems older. Thanks.

## History

### #1 - 2012-01-01 13:05 - Zazvonnyh Alexsey

i did have same bug,  
i my case this because using not updated lightbox plugin.

Thanks.

Downloaded latest lightbox plugin (SAME 0.0.1 version, stupid numbering) from github, it fixed problem.

Decided to remove lightbox plugin completely tho, works ok. I don't like idea using 0.0.1 version plugins anymore :)
