Description			
On the repositories/revision view the file's link "View differences" on the right doesn't work: The entry or revision was not found in the repository. I think the problem is caused by the fact that the link contains two slashes (.../redmine//trunk/...): <code>http://www.redmine.org/repositories/diff/redmine//trunk/app/controllers/repositories_controller.rb?rev=1324</code>

On the repositories/revision the link "View difference" on the right does not work properly:

I got the message : The entry or revision was not found in the repository.
when clicking on the view difference on the right side.

I generate the following url :

`http://www.dawnoflight.org/repositories/diff/dolserver/DOLSharp/trunk/GameServer/commands/playercommands/Repair.cs?rev=1220`
when it should be

`http://www.dawnoflight.org/repositories/diff/dolserver/trunk/GameServer/commands/playercommands/Repair.cs?rev=1220`.

(Notice that "DOLSharp" is the project name.

- Target version deleted (0.7)
- Resolution deleted (Fixed)

This is a different problem.

It's due to the fact that your repository in Redmine points to a subdirectory of your subversion repository (not to the root of the repository). I'll try to fix it.
