Redmine - Defect #9916

500 error on project settings page

2012-01-04 09:29 - Artem Berdishev

Status:	Closed		**Start date:**	
Priority:	Urgent		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Project settings		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Cant reproduce		**Affected version:**	1.3.0

Description

After updating to version 1.3.0 I can't edit project settings. I get the 500 error. Here is the error in the log file:

```
ActionView::TemplateError (undefined method `new_project_issue_category_path' for #<ActionView::Base:0x7f2686426090>) on line #29 of app/views/projects/settings/_issue_categories.html.erb
```

I have tried to find this function, but it's no matches in any file of the project except this one.

History

```

#3 - 2012-02-14 23:35 - Romans Malinovskis

- Assignee set to Jean-Philippe Lang

The line is added in <u>r7881</u> by jplang. Seems like incomplete refactoring. Applying this patch seems to resolve problem:

Changing last line of file app/views/projects/settings/_issue_categories.html.erb to:

```
<p><%= link_to_if_authorized l(:label_issue_category_new), :controller => 'issue_categories', :action => 'new', :project_id => @project %></p>
```

fixed problem for me.

Similarly, there are few more unresolved symbols:

- new_project_query_path
- new_query_path

Which I was able to trace to [r7649](#) by emassip, which affect "issues" page.

Update: same problem appears in 1.3.1

#4 - 2012-02-14 23:56 - Jean-Philippe Lang

- Resolution set to Cant reproduce

You won't find it as it's generated by rails based on routes definitions, see http://guides.rubyonrails.org/routing.html#paths-and-urls FYI. Please, make sure you have a fresh config/routes.rb and try without plugins.

#5 - 2013-04-13 12:14 - Jean-Baptiste Barth

- Status changed from New to Closed

- Assignee deleted (Jean-Philippe Lang)

I can't reproduce on a 2.x install. Please make sure you can reproduce with a fresh install without any plugin or old redmine files and reopen if it still happens.
