Redmine - Feature #9972

Subtasks assigned to same version by default

2012-01-11 05:30 - Travis Blasingame

Description

Could it be implemented where we have an option in settings to force subtasks to be assigned to the same version as the parent. Currently, if I create an issue, then add a subtask, the subtask has to be targeted to a version separately. I am hoping that it could just target the same version by default so that all issues showed properly in the roadmap.
